

## Project Nanuku:

**Recipient Name:** Amit Kumar

**Age:** 18yrs [2015]

**Diagnosis:** Cerebral Palsy since birth

**Caregiver:** Mother – Mrs Daya Kumar

Amit lives with his mother in a one room home at Nanuku Settlement, Vatuwaqa, Suva. Amit was confined to his bed. As he is getting older the demand and responsibility of caring for him was also getting strenuous for his mother, Daya.

Amit's dad passed on three [3yrs] ago leaving behind the responsibility to his mother to shoulder alone taking care of his daily needs. They depend on the Social Welfare Monthly Allowance plus a small tuckshop operating from their home.

VSIAF heard of their plight. He was provided with a wheelchair [and diapers] so he could move around the house.

VSIAF felt to provide some comfort and privacy for both Amit and his mum, by constructing a path to join the main house and their bathroom. This project will help Daya to take Amit to the bathroom rather than carting water from the bathroom tap to bath Amit on the porch area which does not have any privacy from neighbours' homes living around, only a stone throw away. The area [path to the bathroom] is swampy and wet all the time. [See photos below].

### **Scope of Work:**

1. Construction of concrete walkway from main house to bathroom
2. Widening of current bathroom to fit wheelchair and caregiver.
3. Flooring – lay one block on ground to uplift wall
4. Flooring – fill-in concrete cement

5. Door – Widen door to fit width of the wheelchair
  - Construction of walkway from main house to bathroom
