accessibility.

Volunteers at work

Bese

Mr. Josateki Bese was injured from a diving accident some more than twenty [20] years ago.

VSIAF identified Bese through the Home Visitation conducted in collaboration with Ministry of Health and Williams & Goslings Ltd , back in 2011.

Few talanoa sessions with Bese revealed that he suffers from recurring bedsores ; around his back & buttock area . Therefore, lies & confined in the house [on his stomach] 24/7 . Also noted was tarpaulin strapped over the roof top to somehow shelter him from leaking roof.

VSIAF committee analyzed report to address his urgent need . It was decided to construct a bathroom & toilet adjacent to his house so that he could be bathed and caregivers have easy access attending to his daily care/needs.

PROJECT

BESE

- *New building for Bese's bathroom & toilet.*

“Project Bese” completed on 29.11.13
