Assistance Request: Wheelchair

Kuini was assisted with a wheelchair device since her amputee on 25.04.2017. Unfortunately, at one time she fell off her wheelchair into a drainage because her carer did not negotiate the wheelchair well and veered off the footpath which had no railing.

We noticed that Kuini's left side wheel was rolling around on its rim without its tyre & tube. Team was able to locate a wheelchair around the area from a recipient who had passed on.
