

VSI AF REPORT – EQUIPMENT

NAME : Mary Tudreu

AGE : 31yrs (21.08.1989)

ADDRESS: Naicobocobo Rd, Delainavesi

TYPE OD DISABILITY: Hydrocephalus

CARER : Mother (71yrs)

NEED : Hospital Hydraulic Bed

CONTACT : 9965930

Mary suffers from a condition in which fluid accumulates in the brain, typically in young children, enlarging the head and sometimes causing brain damage. She is totally bedridden

She is cared by her 71yrs old mother - a retired nurse. She finds it quite difficult to attend to Mary now citing old age and that Mary is a grown adult with special needs.

Fortunately, her nephews are at hand to assist with lifting, transferring Mary from bed to wheelchair, or wheelchair onto her mattress on the floor and vice versa, if she wants to.

Bed:

Mary sleeps on a wooden single bed. It has gone weak in terms of strength. Now the bed is squeaking and shaking. It can pose a threat for Mary in case the bed breaking anytime soon. Current Bed is too low in height.

VSI AF is on a lookout for a specialized bed for Mary.

Above : Mary's wheelchair which she uses for bath too.

Date of Report: August, 2020.

Equipment Delivery :

On Thursday - 21.01.21, VSIAF Team delivered a much-needed hospital bed and mattress to Mary. Mom & Dad was so thankful for the donation, tears welled up in their eyes, citing the struggle of having to care for Mary on a daily basis. Now they can attend to Mary standing up and no more bending and lifting her from the floor.
